570-710-5165 | art5809@psu.edu | [linkedin.com/in/adam-torres-encarnacion](https://www.linkedin.com/in/adam-torres-encarnacion) | github.com/oxABAN

EDUCATION

The Pennsylvania State University
B.S. in Data Science, B.S. in Statistics

Expected: May 2027
GPA: 3.7

EXPERIENCE

Amazon May 2026 – Aug 2026
Software Engineering Intern Cupertino, CA

- Designed C++ infra for a dual-arm fiber-cleaning robot targeting \$28.6M/year in savings across 85 data centers
- Built a 19-route Coral control plane over SSH, keeping the 1 kHz loop server-side for remote client use
- Centralized 100% of robot geometry and few-shot vision data using typed DynamoDB profiles and S3 storage
- Bootstrapped an MCP using SQLite to compile 74 doc sources into a cited & self-updating knowledge base
- Hardened CI/CD with 3 blocking Brazil build, test, and type-check stages plus atomic, content-addressed SSH releases, preventing dependency drift across dev and robot-host environments

IBM May 2025 – Present
AI Engineering Intern Remote

- Shipped LLM RESTful microservice to power documentation for 3100+ scripts, cutting client costs by \$223,000
- Refined Python file chunking solution using Llama-4 and GPT-4o-mini to process 7+ large-scale internal requests
- Deployed serverless Azure Function Apps with codebase auto-scaling, reducing manual review by 78%

LEADERSHIP

Claude Builder Club Aug 2025 – Jan 2026
Founder University Park, PA

- Selected as 1 of 5 ambassadors to bring Claude AI to Penn State, achieving 260+ club signups within 1 month
- Led 3 workshops on MCPs, Claude Code, and Agentic AI to 170+ students, with 90% attending follow-up sessions

Epoch AI Jan 2025 – Jan 2026
Director University Park, PA

- Led biweekly reading groups on ReAct, RouteLLM, Deepseek to 20+ students per semester at 85% attendance
- Partnered with 3+ AI labs to host PhD panels and professor-led research demos, boosting membership by 247%

PROJECTS

terrari.ai (HackPrinceton '25 xAI 1st place winner) | C#, xAI, tModLoader

- Launched NPC agents mod for Terraria with 10+ tools supported, winning \$8k in xAI credits out of 600+ entrants
- Engineered ReAct loop in C# on grok-4-fast for real-time agentic reasoning, scaling to 50+ parallel agents

simulacra (YHack '26 K2 Think V2 1st place winner) | Next.js, Phaser, FastAPI, LangGraph, Socket.IO

- Won \$500 K2 Think V2 track for a pixel-art policy sim streaming 100 LLM agents across 15 rounds over Socket.IO
- Built LangGraph pipeline injecting 6-trait personas across 8 roles, fanning out parallel LLM reactions via asyncio

nexdraw (NexHacks '26 ByteDance 2nd place winner) | TypeScript, Next.js, Gemini, Supabase, Tailwind, tldraw

- Built "Cursor for artists" solo against 1500+ entrants for real-time LLM canvas editing on Gemini + TypeScript
- Engineered Supabase auto-save (2s debounce, offline-aware) persisting JSONB + per-board PNG previews

formula | Python, FastAPI, Next.js, LangGraph, Cohere, Grok-4-fast, Supabase, Firecrawl

- Built E2E haircare matcher ranking products by INCI ingredient fit after spending \$300+ on biased marketing
- Hand-built agentic Firecrawl + Claude Code harness scraping 250 brands, 6,500 products, and 9,000 unique INCI
- Reranked up to 2,000 candidates into top-100 with Cohere Rerank 4 over YAML fit docs tied to user HairProfile
- Validated finalists via TourRank tournament (R=5 brackets, Grok reasoning) across 3-axis aesthetician rubric

TECHNICAL SKILLS

Programming Languages: Python, C++, SQL, TypeScript, HTML/CSS, R, Lua

Frameworks: PyTorch, Huggingface, Pandas, NumPy, FastAPI, React, Node.js, Next.js, LangChain/LangGraph

Developer Tools: Git, Linux, Vim/Neovim, VS Code, Cmux (agent multiplexer), Claude Code, Agile/Scrum, Pytest

Databases: PostgreSQL, MySQL, SQLite, Redis, MongoDB

Cloud/Infra: AWS (Lambda, S3, EC2, Bedrock, RDS, DynamoDB), Azure (Blob, Foundry, Function Apps), Vercel, Docker, CI/CD, Supabase
