

ADAM TORRES ENCARNACION

570-710-5165 | art5809@psu.edu | linkedin.com/in/adam-torres-encarnacion | github.com/oxABAN

EDUCATION

The Pennsylvania State University

B.S. in Data Science, B.S. in Statistics

Expected: May 2027

GPA: 3.7

EXPERIENCE

Amazon

Software Engineering Intern

May 2026 – Aug 2026

Cupertino, CA

- Designed C++ infra for a dual-arm fiber-cleaning robot targeting \$28.6M/year in savings across 85 data centers
- Built a 19-route Coral control plane over SSH, keeping the 1 kHz loop server-side for remote client use
- Centralized 100% of robot geometry and few-shot vision data using typed DynamoDB profiles and S3 storage
- Bootstrapped an MCP using SQLite to compile 74 doc sources into a cited & self-updating knowledge base
- Hardened CI/CD with 3 blocking Brazil build, test, and type-check stages plus atomic, content-addressed SSH releases, preventing dependency drift across dev and robot-host environments

IBM

AI Engineering Intern

May 2025 – Present

Remote

- Shipped LLM RESTful microservice to power documentation for 3100+ scripts, cutting client costs by \$223,000
- Refined Python file chunking solution using Llama-4 and GPT-4o-mini to process 7+ large-scale internal requests
- Deployed serverless Azure Function Apps with codebase auto-scaling, reducing manual review by 78%

LEADERSHIP

Claude Builder Club

Founder

Aug 2025 – Jan 2026

University Park, PA

- Selected as 1 of 5 ambassadors to bring Claude AI to Penn State, achieving 260+ club signups within 1 month
- Led 3 workshops on MCPs, Claude Code, and Agentic AI to 170+ students, with 90% attending follow-up sessions

Epoch AI

Director

Jan 2025 – Jan 2026

University Park, PA

- Led biweekly reading groups on ReAct, RouteLLM, Deepseek to 20+ students per semester at 85% attendance
- Partnered with 3+ AI labs to host PhD panels and professor-led research demos, boosting membership by 247%

PROJECTS

terrari.ai (HackPrinceton '25 xAI 1st place winner) | C#, xAI, tModLoader | [GitHub](#)

- Created an agentic NPC mod for Terraria using tModLoader with a ReAct-style reasoning loop via Grok-4-Fast, supporting 10+ tools across 50+ parallel agents, winning \$8K in xAI credits (800+ participants)
- Engineered a C# agentic framework with async inference bindings, schema-validated action registry, and automatic replanning on 90-second timeouts

simulacra (YHack '26 K2 Think V2 1st place winner) | Python, FastAPI, LangGraph, Socket.IO | [GitHub](#)

- Designed a FastAPI + LangGraph StateGraph engine with asyncio cognitive loops, shared memory streams, and Pydantic-validated outputs for 100 LLM agents across 15 rounds
- Built per-agent memory with temporal decay, threshold-triggered reflection, and Deffuant opinion dynamics modeling echo chambers across 8 roles with 6-trait personas over Socket.IO

nexdraw (NexHacks '26 ByteDance 2nd place winner) | TypeScript, Next.js, Gemini, Supabase | [GitHub](#)

- Built "Cursor for artists" solo against 1500+ entrants for real-time LLM canvas editing on Gemini + TypeScript
- Engineered Supabase auto-save (2s debounce, offline-aware) persisting JSONB + per-board PNG previews

TECHNICAL SKILLS

Programming Languages: Python, C++, C, SQL, TypeScript, HTML/CSS, R, Lua

Frameworks: PyTorch, Huggingface, Pandas, NumPy, FastAPI, React, Node.js, Next.js, LangChain/LangGraph

Developer Tools: Git, Linux, Vim/Neovim, VS Code, Cmux (agent multiplexer), Agile/Scrum, Pytest

Databases: PostgreSQL, MySQL, SQLite, Redis, MongoDB

Cloud/Infra: AWS (Lambda, S3, EC2, Bedrock, DynamoDB), Azure, Vercel, Docker, CI/CD (GitHub Actions), Supabase
